OIL-FIELD SERVICES

— *Powering the World, Fueling the Future*

Insights, Trends, and
Innovations in the
Global Sector

INTRODUCTION

Integrated Energy Solutions with Global Expertise

CARTEROIL **Oilfield Services**, headquartered in Houston, Texas, is a trusted global provider of comprehensive oilfield and industrial solutions. We deliver turnkey services to governments, operators, and industrial clients in both onshore and offshore environments. With a strong focus on safety, quality, and innovation, our team ensures reliable project execution from design to delivery—meeting the highest international standards every time.

CARTER OILFIELD SERVICES

Shaping the Energy Landscape

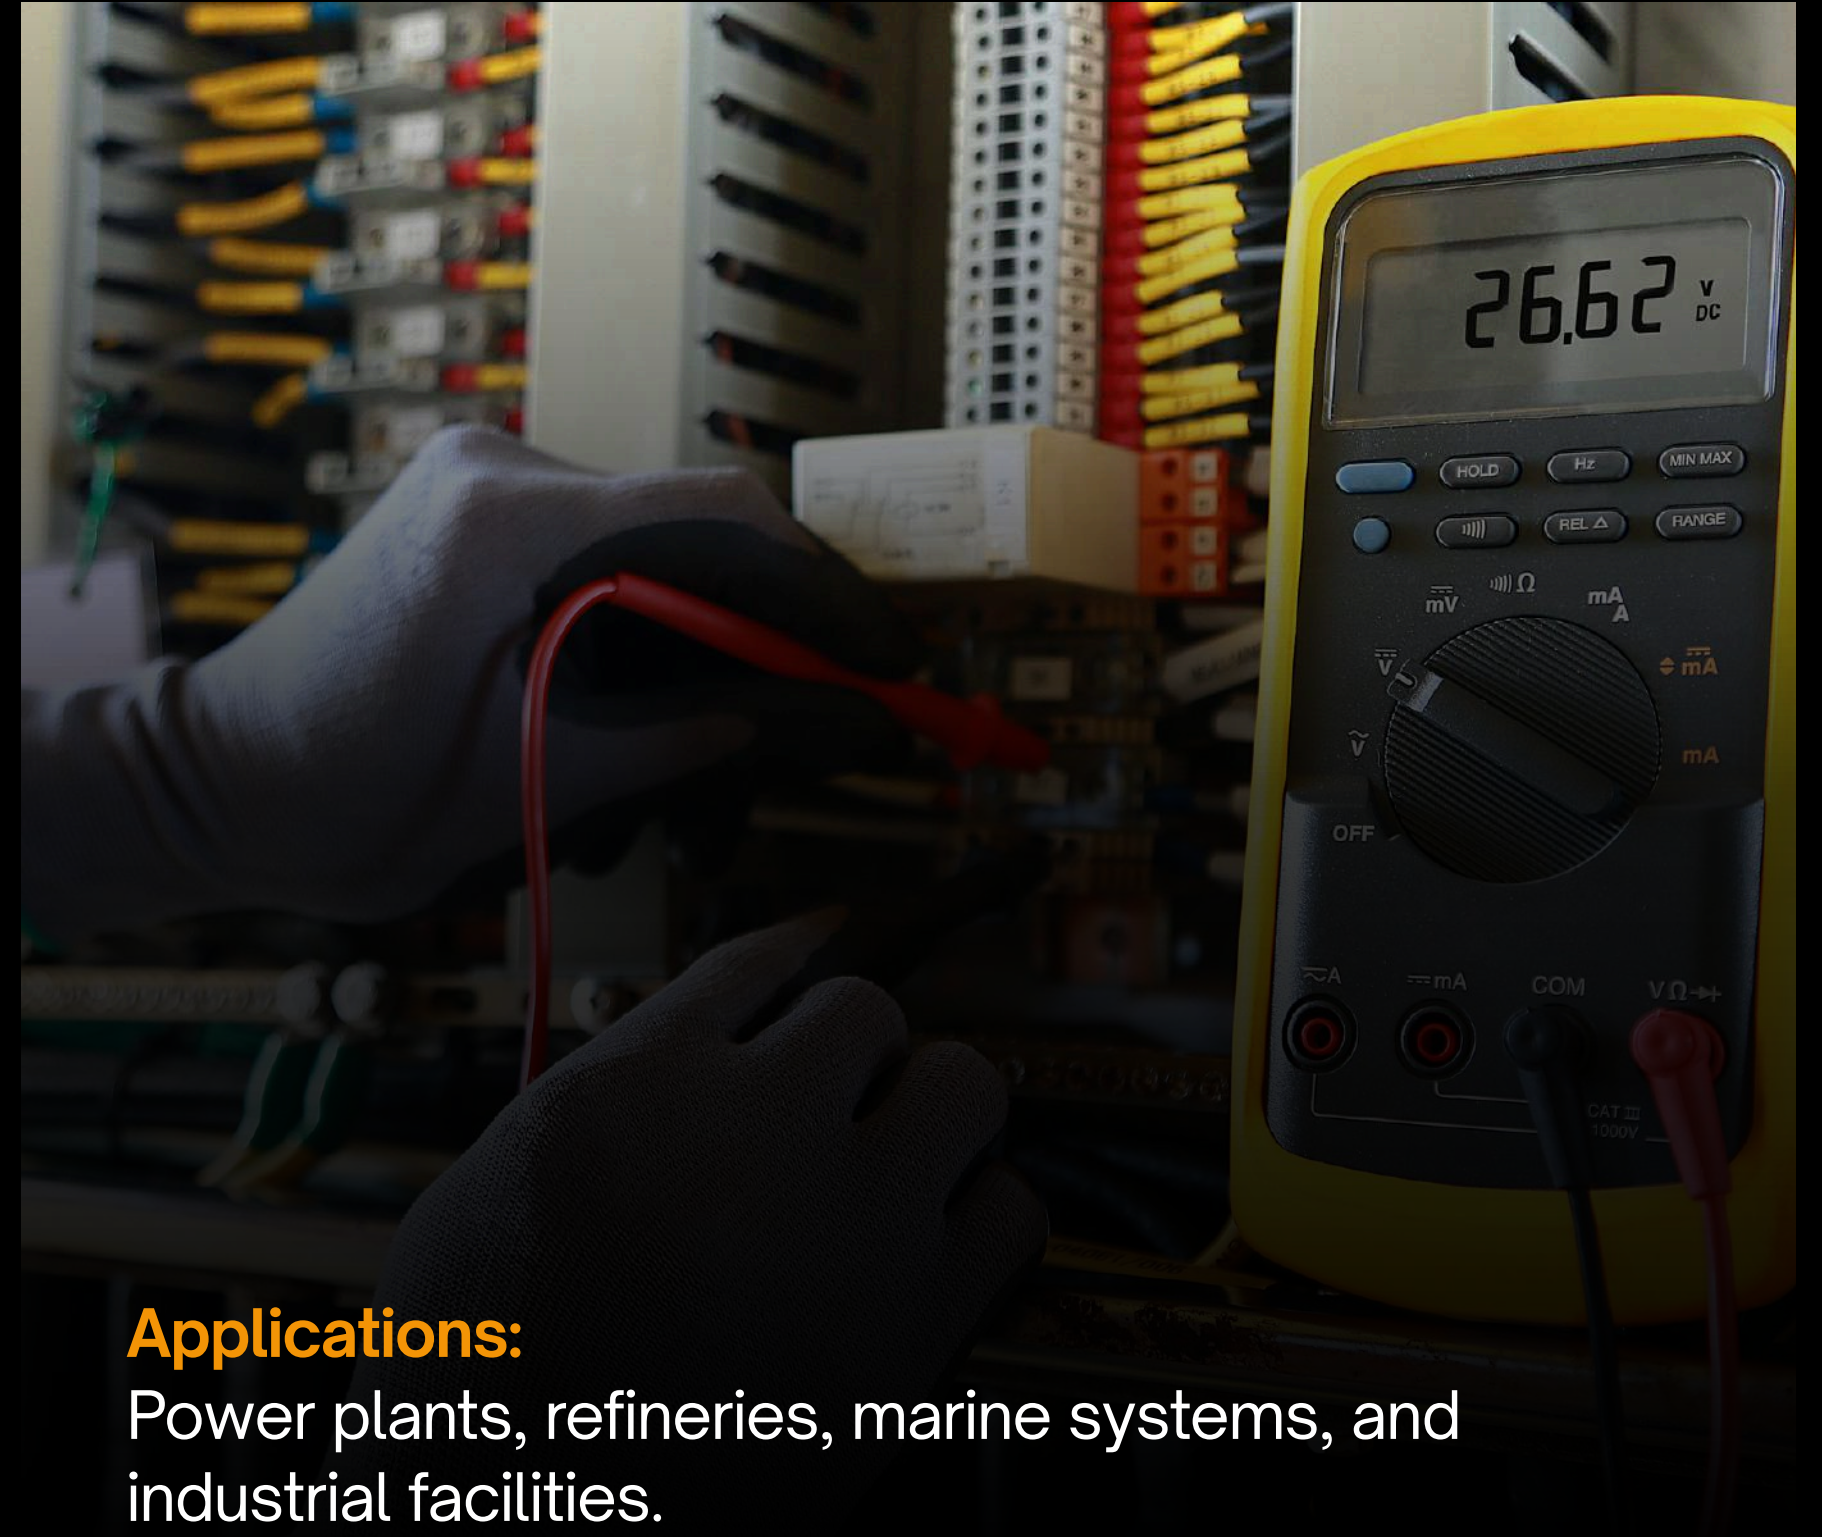

Carter Oilfield Services offers a broad spectrum of specialized services designed to optimize performance, reduce downtime, and ensure operational excellence across industrial and energy sectors.

- **Instrumentation & Electrical**
- **Control Panel Manufacturing**
- **Inspection Services**
- **Manufacturing Support**
- **Equipment Rentals**
- **Technical Staffing**
- **Tubing & Piping Fabrication**
- **Marine Riser Cleaning**

Our highly skilled electricians and service technicians provide complete electrical and instrumentation solutions for new installations, maintenance, and repair work.

- Skilled industrial electricians and certified technicians.
- Expertise in plant wiring, control systems, and field instrumentation.
- Available for on-site and offshore project deployments.

INSTRUMENTATION & ELECTRICAL →

Applications:

Power plants, refineries, marine systems, and industrial facilities.

Carter Oil specializes in engineering and manufacturing electrical control panels for industrial and oil & gas applications.

- ISO 9001 compliant for design and manufacturing.
- Custom-built control systems and automation panels.
- Designed for durability, safety, and precision.

CONTROL PANEL MANUFACTURING ➔

Applications:

Oilfield control systems, process automation, and power distribution.

INSPECTION SERVICES

We offer certified inspection and testing services to ensure equipment integrity and operational safety.

- Certified Welding and NACE Inspectors.
- UL 508A Certified Technicians for control system compliance.
- Rig reactivation and upgrade project management.
- Subsea Well Control System inspections.

Applications:

Drilling rigs, subsea installations, and offshore platforms.

Carter Oil provides OEM manufacturing support for the oil, gas, and industrial sectors. Whether it's outsourcing, assembly, or fabrication assistance, we deliver cost-effective, high-quality solutions.

- Turnkey assembly and manufacturing services.
- Support for component fabrication and mechanical integration.
- Scalable for domestic and international OEM clients.

MANUFACTURING SUPPORT

Applications:

Energy plants, production lines, and offshore fabrication yards.

Applications:

Field operations, pipeline maintenance, and offshore projects.

We maintain a comprehensive inventory of tools and heavy-duty equipment for rental or purchase—ready to meet the demands of any job.

- Hydraulic tube bending and HPUs.
- Welding machines, hydro test tools, and swaging equipment.
- ORFS, flare, and cone & thread tools.

EQUIPMENT RENTALS

TECHNICAL STAFFING

Our global network of experienced field technicians and engineers offers reliable staffing solutions for onshore and offshore projects.

- Skilled workforce for fabrication, installation, and maintenance.
- Offshore-certified technicians for specialized tasks.
- Flexible staffing models for short or long-term projects.

Applications:

Oilfield operations, rig installations, and industrial construction.

Carter Oil specializes in bending, installing, and integrating hydraulic, electrical, and pneumatic systems for OEMs worldwide.

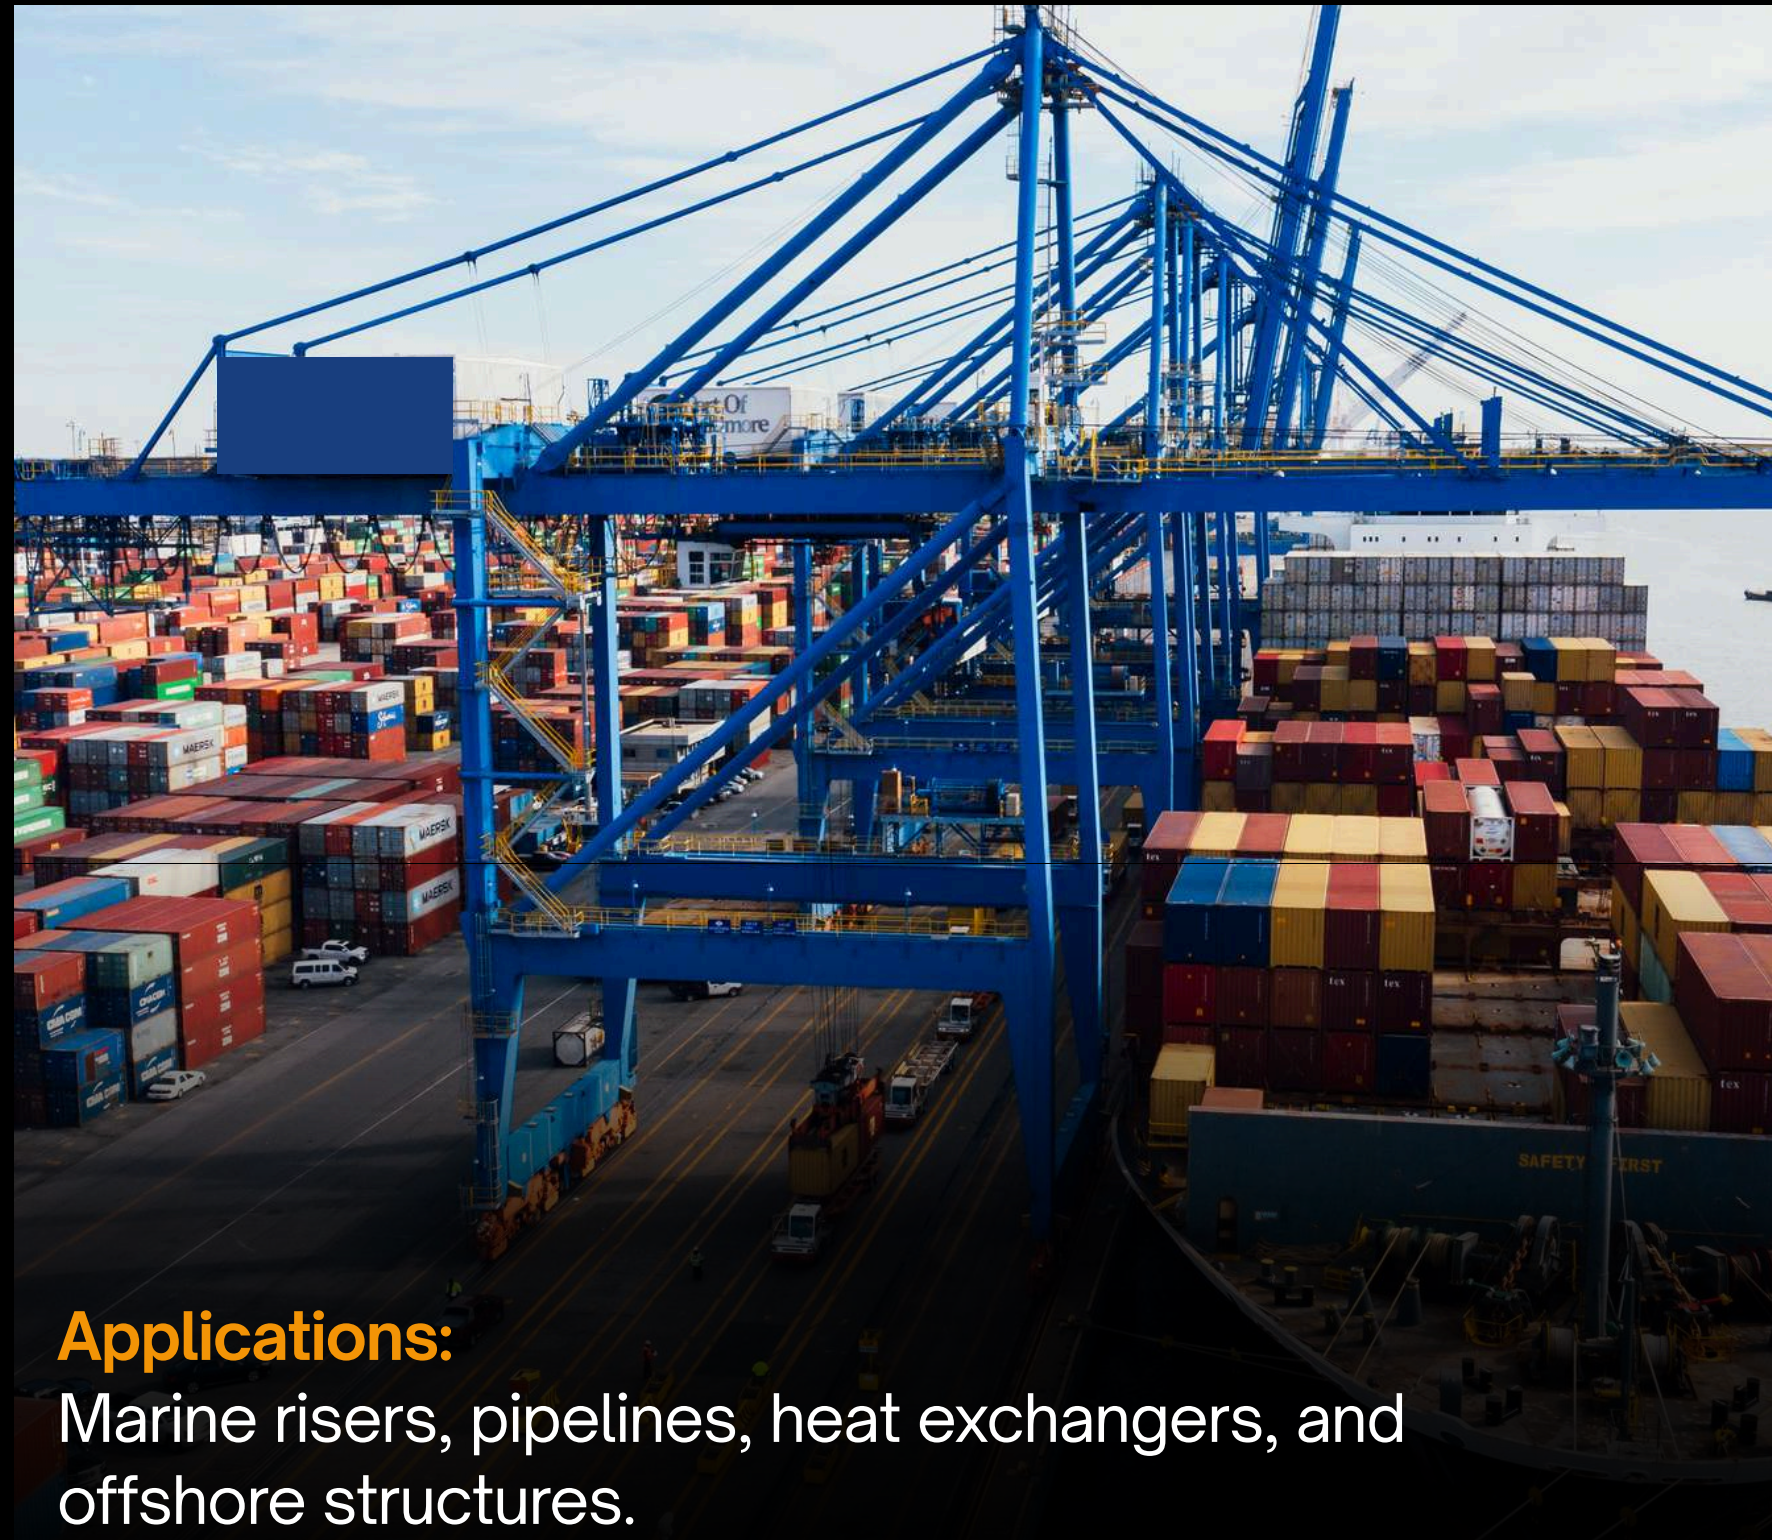

- Precision tubing and piping fabrication.
- Repairs and integration of multi-discipline systems.
- Compliant with international standards for oilfield operations.

TUBING & PIPING FABRICATION ➔

Applications:

Subsea modules, refineries, process plants, and power units.

Applications:

Marine risers, pipelines, heat exchangers, and offshore structures.

We use ultra high-pressure hydro blasting for effective cleaning across marine and industrial applications. This process ensures maximum equipment longevity and safety.

- Efficient removal of rust, scale, and marine growth.
- Environmentally responsible cleaning process.
- Used extensively in the oil & gas sector.

MARINE RISER CLEANING

INTEGRATED PROJECT SOLUTIONS

Carter Oilfield Services provides complete EPC and turnkey project management, delivering custom-engineered solutions that adapt seamlessly to project changes and timelines.

- Fast-track project execution.
- Production facility design and process skid manufacturing.
- Tailored solutions for gas treatment, lube oil skids, and pump packages.
