TUBING & PIPING FABRICATION

— *Powering the World, Fueling the Future*

Insights, Trends, and
Innovations in the
Global Sector

INTRODUCTION

Precision Engineering for Reliable Performance

Carter Oil provides end-to-end tubing and piping solutions for the oil and gas industry, covering everything from design and supply to fabrication and installation. Our systems are engineered for superior reliability, safety, and performance in high-pressure and high-temperature environments. Backed by decades of expertise and a global network of certified suppliers, we ensure seamless integration and long-term durability across all operations.

Carter Oil offers a full line of industrial-grade tubing and piping components, precision-built for efficiency and longevity. Each product is designed to meet international standards, ensuring consistent performance across onshore and offshore applications.

- **Tubing & Piping Systems**
- **Fittings & Connectors**
- **Fabrication & Installation Services**

OUR EQUIPMENT RANGE

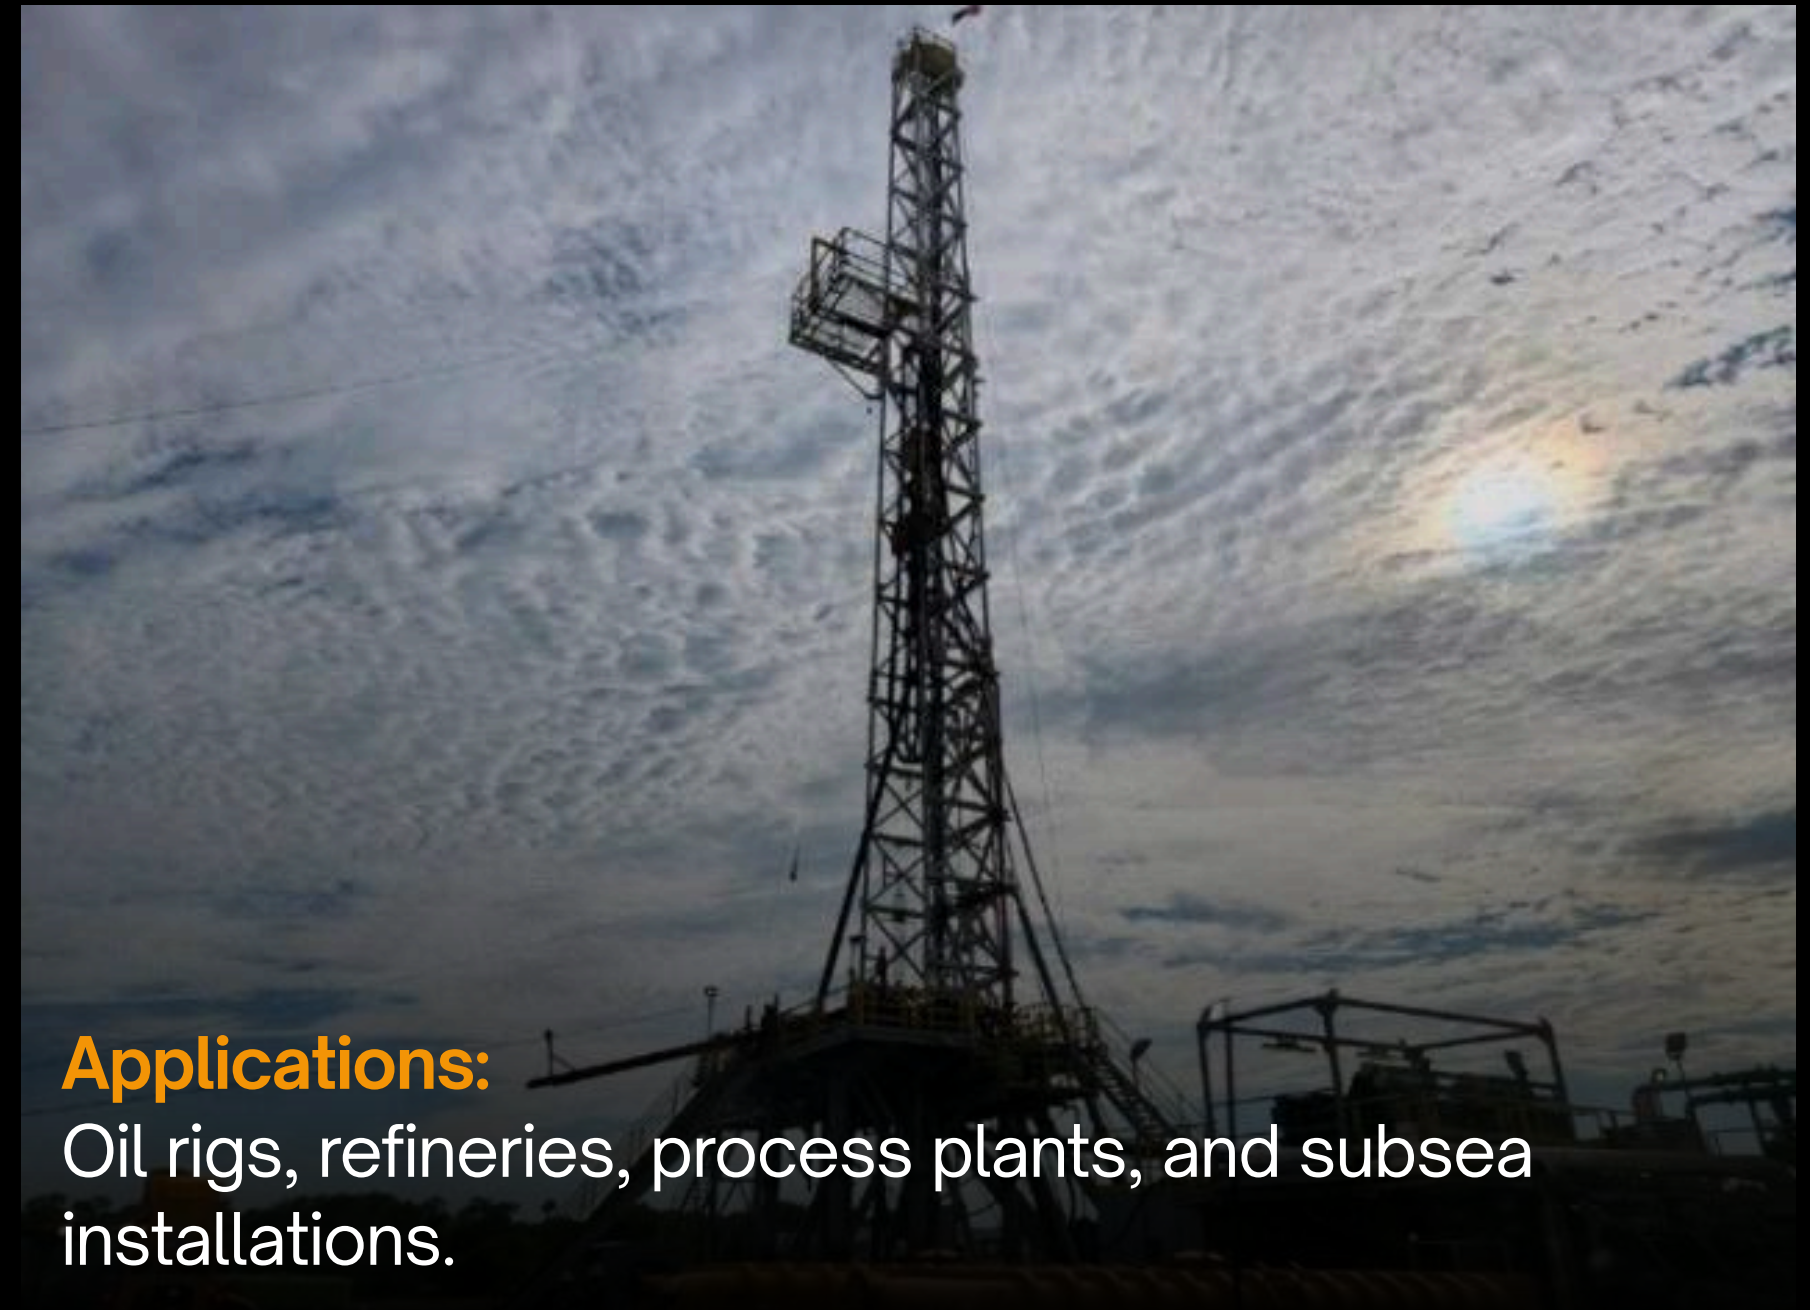

Carter Oil supplies and fabricates premium-grade tubing and piping systems suitable for drilling, production, and hydraulic applications. Our assemblies are manufactured to exact tolerances and built to handle extreme working conditions.

- Seamless & welded tubing (carbon steel, stainless steel, duplex).
- High-pressure piping for drilling and flowline operations.
- Tubing available in various sizes and wall thicknesses.
- Engineered for corrosion resistance and long service life.

TUBING & PIPING SYSTEMS

Applications:

Oil rigs, refineries, process plants, and subsea installations.

Applications:

Hydraulic control panels, rig piping systems, and marine structures.

Our fittings and connectors are built for secure, leak-free performance in complex hydraulic and pneumatic systems. Each component is tested for integrity and durability under dynamic load conditions.

- Cone & Thread, ORFS, Flare, and Compression Fittings.
- Couplings, adaptors, and custom-engineered joints.
- Precision machining ensures perfect sealing and alignment.

FITTINGS & CONNECTORS

FABRICATION & INSTALLATION SERVICES

Carter Oil offers precision bending, welding, and assembly of tubing and piping systems using state-of-the-art equipment and certified technicians. We also provide field installation, repair, and inspection to ensure compliance with global standards.

- CNC bending and orbital welding for accurate fabrication.
- Custom skid integration and system upgrades.
- On-site installation and maintenance by qualified engineers.
- Adherence to ASME, API, and ISO fabrication standards.

Applications:

Subsea modules, production skids, power units, and offshore platforms.

WHY CHOOSE CARTER OIL TUBING & PIPING SOLUTIONS

- Comprehensive Capabilities: From supply to installation, all under one roof.
- Certified Quality: Products and processes comply with international oilfield standards.
- Global Reach: Trusted supplier for onshore and offshore projects worldwide.
- Proven Experience: Over two decades of excellence in tubing and piping fabrication.
